## Trouble in Paradise: Common Disorders of the Excretory System

### Open-Ended Response Questions

1. Discuss the potential complications of untreated kidney stones and urinary tract infections (UTIs). How can early diagnosis and treatment help prevent these complications?
2. How can lifestyle choices, such as diet and exercise, play a role in preventing or managing chronic kidney disease? Explain the importance of early detection and management of this condition.
3. Describe the impact of urinary incontinence on a person's daily life and well-being. What strategies or treatments can be effective in managing this condition?
4. If someone has a family history of polycystic kidney disease (PKD), what steps can they take to monitor and manage their risk of developing the disease? How does PKD affect the kidneys over time?
