

Name _____

Exploring Common Fabrics and Materials in Clothing

Short Answer Key

1. Cotton is soft, breathable, and comfortable, making it suitable for warm weather clothing. It wicks away sweat and helps keep the wearer cool.
2. Leather is commonly found in jackets and provides protection from the elements due to its durability and toughness.
3. Spandex (Lycra) in activewear provides stretch and flexibility, allowing for a wide range of movement during physical activities.
4. Rayon is considered semi-synthetic because it is made from wood pulp but undergoes chemical processing. It is used in blouses, dresses, and casual wear due to its softness and breathability.
5. Fleece provides warmth and comfort in cold-weather clothing because of its insulating properties and soft texture.
