## Unveiling the Symptoms: Recognizing Common Infectious Diseases

### Short Answer Key

1. Symptoms of the common cold include a runny or stuffy nose, sneezing, sore throat, cough, mild fever, and fatigue.
2. Symptoms of gastrointestinal infections typically include diarrhea, vomiting, nausea, abdominal cramps, and sometimes fever.
3. Chickenpox typically presents with an itchy rash that starts as small red spots and progresses to fluid-filled blisters, along with fever, headache, and fatigue.
4. A distinguishing feature of the rash in measles is that it typically starts on the face and spreads to the rest of the body.
5. One symptom that differentiates the flu from the common cold is the sudden onset of fever.
