## How Does a Rabbit Communicate?

### Short Answer Key

1. A rabbit nudging you with its nose might be asking for attention.
2. A scared rabbit crouches low to the ground with its ears flat back.
3. Rabbits communicate using body language and scents.
4. Baby rabbits squeak to get their mother's attention.
5. Humans can understand a rabbit's feelings by observing its body language, sounds, and behavior.
