

Name _____

How Do Meerkats Communicate?

Short Answer Key

1. Meerkats warn each other with loud barking sounds.
2. Grooming helps meerkats build trust and strengthen social bonds.
3. Scent marking helps meerkats mark their territory and identify members of their group.
4. Body gestures like standing tall help meerkats stay alert and watch for predators.
5. Meerkats use chirps to guide their young while hunting and learning about prey.
