## Dolphin Dialogues: Exploring Communication in the Ocean's Smartest Creatures

### Short Answer Key

1. A signature whistle is a unique vocalization developed by each dolphin, serving as a means of maintaining contact with other dolphins, reuniting after separation, and conveying identity information.
2. Dolphins use echolocation clicks to navigate and locate prey.
3. Dolphins use behaviors such as leaps, spins, and slaps of their flippers on the water's surface to communicate with each other.
4. Cooperative hunting.
5. Dolphins reunite after separation by using their signature whistles to call out to each other and locate one another.
