

Name _____

Salad vs. Saltwater — What Can You Separate?

Short Answer Key

1. A mixture is when two or more things are combined but stay the same.
2. A solution is when one substance dissolves into another.
3. Because it breaks into tiny pieces too small to see.
4. By letting the water evaporate and leaving the salt behind.
5. Mixtures can be taken apart easily; solutions need special tools to separate.
