

Name _____

What's Really in the Air?

Open-Ended Response Answer Key

1. If the air has too much or too little of certain gases, it can be hard to breathe or even harmful.
2. Trail mix, salad, and tap water are common mixtures.
3. They want to protect health, study the environment, and design safe spaces.
4. We couldn't clean air pollution as easily, and breathing might be much harder or more dangerous.
