

Name _____

Why Water Matters

Open-Ended Response Answer Key

1. Because all living things need it to stay alive. It helps their bodies work properly.
2. Carbon dioxide—it's used by plants to make food, which helps all living things.
3. Plants, animals, and people would not survive. Everything would dry out.
4. It shows how elements work together to support life, and helps us care for the planet.
