## Unlocking the Magic: Understanding Tennis Court Geometry

### Short Answer Key

1. The doubles court is wider than the singles court.
2. Net clearance is important to ensure the ball clears the net without hitting it.
3. Service boxes are marked areas on the court where the server must aim their serves.
4. Serving diagonally into the service box can create difficult angles for the opponent.
5. Hitting sharp angles at the net during volleys can put the ball out of the opponent's reach.
