

Name _____

The Curious Kid's Crazy Experiments

Open-Ended Response Questions

1. Reflect on the role of curiosity in Max's life and how it led to his wild and wacky experiments. What qualities does Max possess that make him a great scientist?
2. Consider the unpredictable and comical results of Max's experiments. How do you think the element of surprise and unexpected outcomes added to the fun and excitement of his scientific adventures?
3. Max often shared his experiments with his friends. How did this collaboration enhance the enjoyment of his experiments, and what do you think his friends learned from participating in these adventures?
4. Share a personal experience when you tried an experiment or project that didn't go as planned but turned out to be fun and memorable. What did you learn from that experience?
