

Name _____

Where Do Crickets Call Home?

Short Answer Key

1. Forests and grasslands (other acceptable answers: gardens, caves, tropical areas).
2. Crickets cannot survive in Antarctica because it is too cold.
3. Crickets hide under rocks, leaves, or in soil to stay safe from predators.
4. Crickets recycle nutrients by eating plants and seeds, and they provide food for birds and other animals.
5. Tropical crickets prefer hot and humid climates.
