

Name _____

What's on a Cricket's Menu?

Short Answer Key

1. Being omnivores means crickets eat both plants and animals.
2. Crickets eat grass, leaves, flowers, seeds, and fruits.
3. Crickets search for food at night to stay safe from predators.
4. Crickets use their antennae to sense smells and movements to locate food.
5. Crickets recycle nutrients by eating decaying plant material and returning nutrients to the soil.
