Name _____

How Do Crickets Start Their Families?

Open-Ended Response Questions

1. Why do you think male crickets use chirping to attract females instead of other methods?

2. Imagine you are a baby cricket (nymph). What challenges might you face as you grow up?

3. How does laying eggs in safe places help cricket populations survive?

4. Why don't adult crickets take care of their young? How might this affect the nymphs?
