## Crickets: Tiny Musicians of the Night

### Short Answer Key

1. Crickets make their chirping sound by rubbing one wing against the other in a process called stridulation.
2. Crickets are considered lucky in some cultures because of their presence in homes or as symbols of good fortune.
3. Crickets might hide under rocks, leaves, or in tree cracks during the day.
4. Birds, frogs, and spiders commonly eat crickets.
5. Most crickets are 1 to 2 inches long.
