

Name _____

The Perils of a Cricket's World

Short Answer Key

1. Frogs and birds eat crickets.
2. Cold temperatures, heavy rain, and strong winds can be dangerous for crickets.
3. A cricket's camouflage helps it blend into its surroundings, making it harder for predators to see them.
4. Crickets stay healthy by grooming themselves and avoiding damp areas where fungus can grow.
5. Habitat destruction reduces the places where crickets can live, making it harder for them to find food and shelter.
