

Name _____

Crocodile's Diet: Carnivore Kings

Short Answer Key

1. Adult crocodiles eat fish, birds, mammals, and sometimes large animals like deer or buffalo.
2. Young crocodiles eat smaller prey like insects, frogs, and small fish.
3. Crocodiles stay very still in the water and strike quickly when prey comes close.
4. Crocodiles have sharp teeth for gripping and tearing their food.
5. Crocodiles can eat large meals and go without food for a long time.
