

Name _____

Crocodile Communication: Nature's Silent Language

Open-Ended Response Answer Key

1. Crocodile communication helps them find mates, protect their territory, and care for their young.
2. Crocodiles use sounds, body movements, and vibrations to communicate. Each method helps them survive in their environment.
3. Many animals use sounds and body language to warn of danger or attract mates, similar to crocodiles.
4. (Example) As a crocodile, I would bellow loudly to scare rivals and splash water with my tail to show strength.
