## Life on the Farm: A Farmer's Journey

### Short Answer Key

1. Morning chores may include feeding animals, milking cows, and checking on livestock health.
2. Farmers can solve problems through research, seeking advice from experienced farmers, and experimenting with different solutions.
3. Maintaining equipment is important to ensure it functions correctly and doesn't break down during critical tasks.
4. Harvesting is important as it's the time when crops are gathered, providing the produce for sale or consumption.
5. Farmers need to plan for the future to make informed decisions about crops, budgets, and farm improvements.
