

Name _____

Exploring the Verdant Plains: Unveiling the Grassland Biome

Short Answer Key

1. Temperate deciduous forests experience four distinct seasons: spring, summer, autumn, and winter.
2. Examples of dominant tree species include oak, maple, beech, and birch.
3. Leaf litter provides nutrients to the soil through decomposition and creates habitat for soil-dwelling organisms.
4. Common wildlife found in temperate deciduous forests include deer, bears, squirrels, woodpeckers, owls, and songbirds.
5. Human activities such as deforestation, urbanization, and pollution have impacted temperate deciduous forests by causing habitat loss and fragmentation.
