

Name _____

Unlocking the Magic of Neural Networks and Deep Learning

Open-Ended Response Questions

1. Imagine you are explaining neural networks to a friend. How would you describe them in your own words?
2. Think of an everyday situation where neural networks are used but not mentioned in the passage. Describe how they might be applied in that situation.
3. How do you think deep learning can benefit fields like healthcare and education?
4. If you were to create a new application for neural networks, what problem would you want it to solve, and how would it work?
