## Exploring the World of Deer

### Open-Ended Response Answer Key

1. (Example) As a deer, I wake up in the forest and search for food. I listen carefully for sounds and sniff the air for danger. If I hear a predator, I run quickly to stay safe.
2. (Example) Deer need large spaces to roam and find food. They are wild animals and would not be happy or healthy as pets.
3. (Example) If there were no deer, some predators might not have enough food, and plants might not spread seeds as easily.
4. (Example) Deer have large ears and a strong sense of smell. These senses help them detect danger early so they can run away and stay safe.
