

Name _____

Understanding the Daily Habits of Deer

Open-Ended Response Answer Key

1. (Example) A deer rests in tall grass during the day, becomes active at dusk to search for food, and stays alert for predators while grazing.
2. (Example) Being active at twilight helps deer avoid many predators who hunt during the day or night.
3. (Example) Deer help control plant growth and spread seeds, keeping the ecosystem balanced.
4. (Example) As a deer, I would stay hidden in tall grass, listen carefully for sounds, and stay close to my herd for safety.
