

Name _____

Deer Predators and Threats in the Wild

Open-Ended Response Answer Key

1. Deer defend themselves by running quickly, using their senses, and blending into their surroundings.
2. Human activities affect deer because they lose their homes and food sources.
3. We can protect deer by preserving forests, preventing hunting, and controlling disease spread.
4. (Example) If I were a deer, I would stay alert, use my senses, and hide in the forest when I sense danger.
