

Name _____

Decoding Derivatives: Unveiling the Secrets of Functions

Short Answer Key

1. It tells us how the function is changing at any given point.
2. The power rule, which applies to functions raised to a power.
3. It's used when dealing with the product of two functions.
4. It's like peeling off layers of an onion to get to the core.
5. The derivative tells us the slope of the tangent line at any point on the graph of the function.
