## Exploring the World of Non-Vascular Plants: Understanding the Differences

### Multiple Choice Questions

1. Where are non-vascular plants commonly found?
  - A) Deserts
  - B) Tundra
  - C) Mountains
  - D) Rainforests
  
2. What structures do non-vascular plants lack?
  - A) Roots, stems, and leaves
  - B) Flowers and fruits
  - C) Xylem and phloem
  - D) Sporangia
  
3. How do non-vascular plants reproduce?
  - A) By seeds
  - B) Through rhizoids
  - C) By spores
  - D) Through fragmentation
  
4. What is the role of rhizoids in non-vascular plants?
  - A) Absorbing water and nutrients
  - B) Transporting sugars
  - C) Anchoring the plant
  - D) Producing spores
  
5. What is a key difference between non-vascular and vascular plants?
  - A) Method of reproduction
  - B) Size and complexity
  - C) Habitat preference
  - D) Leaf structure
