## The Time-Traveler's Dilemma

### Open-Ended Response Answer Key

1. The Temporal Explorers faced ethical dilemmas such as whether to intervene in historical events to prevent tragedies or to let history run its course. These dilemmas caused disagreements among the group and ultimately led them to decide that tampering with the past was too risky and irresponsible.
2. The Temporal Explorers' experiences in the past and future made them realize the complexity and interconnectedness of historical events and the consequences of their actions. This understanding emphasized their responsibility to preserve the timeline and avoid causing unintended harm.
3. Yes, the Temporal Explorers made the right choice in returning the time machine because they recognized the potential dangers and ethical issues of altering the timeline, and they prioritized safeguarding history over their adventurous desires.
4. If I had the opportunity to time travel, I would visit the Renaissance period to witness the flourishing of art and science. This experience would likely deepen my appreciation for human creativity and innovation and provide valuable insights into the historical development of modern thought and culture.
