

Name _____

Dolphin Dwellings: Exploring the Habitats of These Aquatic Marvels

Short Answer Key

1. Dolphins can be found in coastal waters, rivers, polar regions, and oceans.
2. Dolphins adapt to life in coastal waters by utilizing rich feeding grounds and sheltered areas for breeding.
3. Threats to dolphins in human-dominated areas include pollution, habitat loss, entanglement in fishing gear, and boat strikes.
4. The Amazon River dolphin and the Ganges River dolphin are known for inhabiting freshwater habitats.
5. The goal of conservation efforts for dolphins is to protect their habitats and mitigate human impacts on their populations.
