

Name _____

Dragonflies: Nature's Shiny Flyers

Short Answer Key

1. A dragonfly's wingspan can be up to 6 inches.
2. Dragonflies use their large eyes to spot prey and to see nearly everything around them.
3. Dragonflies can be blue, green, red, yellow, or even metallic gold. Some have stripes or spots on their bodies and wings.
4. Dragonfly legs form a basket in midair to catch insects while flying.
5. Dragonfly wings are transparent with tiny veins, making them strong and flexible.
