

Name _____

Dragonflies: Nature's Shiny Flyers

Open-Ended Response Answer Key

1. Dragonflies need to be fast and lightweight to catch food and escape predators.
2. Dragonfly colors can help them camouflage to hide from predators or attract mates.
3. An ideal airplane design might include independently moving wings for agility, a lightweight body for speed, and excellent vision for navigation.
4. Without their incredible vision, dragonflies might not be able to catch food or avoid predators effectively.
