

Name _____

The Dangers Dragonflies Face

Short Answer Key

1. Birds, frogs, spiders, beetles, and fish.
2. Habitat destruction removes the clean water and plants dragonflies need to survive and reproduce.
3. Dragonflies use their excellent eyesight to spot predators early and avoid being caught.
4. Humans harm dragonflies through pollution and habitat destruction. They can help by reducing pesticide use and preserving wetlands.
5. Wetlands provide the water and plants dragonflies need for laying eggs and for nymphs to grow.
