

Name _____

What Does a Monkey Eat?

Short Answer Key

1. Being omnivores means monkeys eat both plants and animals.
2. Monkeys eat fruits, leaves, seeds, insects, and small animals.
3. Insects provide protein, which helps monkeys stay strong and healthy.
4. Colobus monkeys have a special stomach that helps them digest tough leaves.
5. Monkeys like capuchins use rocks to crack open nuts and seeds.
