

Name _____

What Does a Panda Eat?

Short Answer Key

1. The main food in a panda's diet is bamboo.
2. Pandas use their special "thumb" to hold and grab bamboo while eating.
3. Pandas eat so much bamboo because it is low in nutrients, so they need to eat a lot to stay healthy.
4. Besides bamboo, pandas might eat small animals, eggs, or other plants.
5. Conservation efforts focus on protecting and growing bamboo forests to help pandas survive.
