

Name _____

Elephant Daily Habits and Behaviors

Open-Ended Response Answer Key

1. Elephants help maintain plant life by spreading seeds and creating pathways in forests.
2. They stay together, comfort each other, and help protect the young and sick members.
3. Elephants face threats like habitat loss and poaching. People can help by supporting conservation groups and reducing poaching.
4. The matriarch leads the herd, finds food and water, and protects the group with her experience.
