## Ellis Island's Final Days

### Short Answer Key

1. The Immigration Act of 1924 limited the number of immigrants allowed each year and required them to get visas before traveling.
2. After 1924, immigrants were checked before leaving their home countries, so Ellis Island was no longer necessary for most travelers.
3. During World War II, Ellis Island was used as a detention center for prisoners and people from enemy countries.
4. After World War II, stricter immigration laws and new travel rules made it harder for many people to come to the U.S.
5. After Ellis Island closed, it became a museum to teach people about immigration history.
