## The Empathy Experiment

### Short Answer

1. What were the two different methods Dr. Turner used to teach empathy in her experiment?
2. What were the results of the experiment regarding the group exposed to electronic devices, and what ethical concerns did this raise?
3. What prompted Dr. Turner to make a significant decision regarding the experiment, and what was that decision?
4. What broader discussion did Dr. Turner's research contribute to, and what was the conclusion regarding empathy from her experiment?
