## Real Estate - What is it and What Does it Encompass?

### Short Answer Key

1. An example of recreational real estate could be a public park with playgrounds and walking trails.
2. Real estate agents help buyers and sellers find, negotiate, and complete transactions for properties, providing guidance throughout the process.
3. Environmental concerns related to real estate include deforestation, habitat destruction, and pollution from construction and development.
4. The economy can impact the real estate market by influencing people's ability to buy properties and invest in real estate.
5. Industrial real estate is used for manufacturing and storage purposes.
