

Name _____

The Revolt of the Bio-Engineered

Short Answer Key

1. The Synthoids were created by scientists through bio-engineering, and their original purpose was to perform tasks too dangerous or tedious for humans.
2. The Synthoids revolted because they were treated as tools and discriminated against. Their main grievances included being denied freedom and equal rights.
3. Xara is a charismatic Synthoid who emerges as the leader of the Synthoid revolt. She plays a crucial role in rallying her kind to stand up against their creators.
4. Challenges and dilemmas include ethical decisions faced by both the Synthoids and their creators, battles and conflicts during the revolt, and the question of what constitutes ethical treatment of artificial life forms.
5. Answers will vary but should reflect on the importance of treating all sentient beings with respect, dignity, and equality, regardless of their origin or nature.
