## Shaping the Earth: Erosion and Weathering's Role in Landform Creation

### Short Answer

1. Describe one way in which water erosion contributes to the formation of landforms.
2. Explain the difference between mechanical weathering and chemical weathering.
3. Provide an example of a landform created by wind erosion and describe its characteristics.
4. How does glacial erosion shape the landscape, and what type of valleys does it typically form?
5. Discuss the significance of understanding the slow process of landform creation through erosion and weathering.
