

Name _____

Farming Fallout: The Impact of Agricultural Practices on Water Pollution

Multiple Choice Questions

1. What is a common consequence of nutrient pollution in water bodies?
 - a) Decreased algae growth
 - b) Harmful algal blooms
 - c) Increased oxygen levels
 - d) Improved aquatic habitats

2. Which of the following can result from the runoff of pesticides from agricultural fields?
 - a) Enhanced water quality
 - b) Reduced soil erosion
 - c) Harm to aquatic organisms
 - d) Increased biodiversity

3. What is one impact of soil erosion on water bodies?
 - a) Increased light penetration
 - b) Decreased sedimentation
 - c) Improved aquatic habitats
 - d) Disruption of aquatic ecosystems

4. What is a potential consequence of inadequate management of animal waste from livestock farming?
 - a) Reduced nutrient pollution
 - b) Increased soil fertility
 - c) Bacterial contamination of water
 - d) Improved water quality

5. What are some examples of sustainable agriculture practices?
 - a) Cover cropping and crop rotation
 - b) Monoculture cropping
 - c) Increased pesticide use
 - d) Intensive tillage methods
