Name _____

Choosing the Right Fertilizer for Your Plants

Open-Ended Response Questions

1. Imagine you have a garden with various plants, including tomatoes, cucumbers, and lettuce. Explain which type of fertilizer and N-P-K ratio you would choose for each plant, and justify your choices based on their nutrient requirements.

2. Reflect on the importance of reading and following the instructions on fertilizer labels. Describe what could happen if a gardener neglects to do so.

3. Research and share a specific example of an organic fertilizer that can be used in gardening. Explain why this fertilizer is considered beneficial for plants and the environment.
