

Name _____

From Fields to Factories: How the Industrial Revolution Led to Urbanization

Short Answer Key

1. These inventions allowed for faster and more efficient textile production, increasing output and lowering costs.
2. They allowed for the easier transportation of goods, connecting urban areas to distant regions and further promoting urbanization.
3. Overcrowding often led to unsanitary living conditions, increased disease transmission, and limited personal space.
4. Labor movements emerged to advocate for better working conditions, fair wages, and workers' rights.
5. Urbanization and industrialization led to economic growth by boosting production and trade but also brought challenges like poor working conditions and income inequality.
