

Name _____

What's on the Firefly's Menu?

Short Answer Key

1. Firefly larvae eat small animals like snails and worms, while adults eat little or sip nectar.
2. The firefly's glow can scare predators away.
3. Some adult fireflies live off the energy stored from their larval stage.
4. Firefly larvae eat snails, slugs, and worms.
5. Fireflies help balance ecosystems by eating pests that can harm plants.
