

Name _____

Firefly Life Cycle: From Glow to Glow

Short Answer Key

1. The larval stage is the longest stage in a firefly's life.
2. Firefly larvae glow to scare off predators.
3. A female firefly can lay 50 to 100 eggs at one time.
4. Inside the pupa, the firefly grows wings, antennae, and its lantern.
5. Adult fireflies only live for a short time to focus on finding mates and reproducing.
