

Name _____

Fireflies: Small Creatures with Big Jobs

Short Answer Key

1. Firefly larvae eat pests like slugs and snails, which helps protect crops and plants.
2. Frogs and birds eat fireflies.
3. Fireflies are indicators of a healthy environment because they live in clean, natural habitats.
4. Fireflies thrive in wetlands, forests, and meadows.
5. Protecting fireflies helps keep ecosystems balanced and supports farming by reducing pests.
