

Name _____

Defending the Digital Fortress: The Magical World of Firewalls

Short Answer

1. Explain in your own words what a firewall does in cybersecurity.
2. Describe the difference between software and hardware firewalls.
3. Why is it important for a firewall to keep a log of visitors?
4. If you were the castle's king (the user), what kind of rules would you set for your firewall to follow?
5. Can you think of an everyday analogy that helps explain how a firewall works?
