

Name _____

Flat to boy with a door

Retortly possing problems.

Flat but Fearless

When Stanley Lambchop woke up one morning, he never imagined his life was about to change forever. During the night, a bulletin board had fallen on him, pressing him completely flat. At first, Stanley was shocked. "How will I ever be normal again?" he wondered. But instead of letting his flatness ruin his life, he began to find unexpected advantages.

Stanley quickly realized that his new shape allowed him to do things no one else could.

He could slide under doors without opening them, making hide-and-seek the easiest game ever. When his mother lost her ring down a drain, Stanley slipped through the small opening and retrieved it with ease. His ability to squeeze into tight spaces made him helpful in ways he had never imagined.

One of Stanley's most daring adventures happened when he helped catch a group of art thieves. The museum was struggling to stop criminals from stealing valuable paintings. Stanley had an idea—he would disguise himself as a painting and hang on the wall! That night, when the thieves tried to steal him, he sprang to life and helped capture them. The museum director and the police praised his cleverness and bravery.

Stanley's biggest challenge, however, was dealing with how others treated him. Some classmates teased him, calling him "Flatty" and laughing at his unusual appearance. At first, their words hurt, but Stanley reminded himself of all the ways his flatness had helped people. Instead of feeling embarrassed, he focused on the positives. He had adventures, solved problems, and even became a hero.

Eventually, Stanley and his brother, Arthur, found a way to return him to his normal shape. Using a bicycle pump, Arthur carefully pumped air into Stanley until he was round again. While Stanley was happy to be back to normal, he would never forget the lessons he had learned.

His journey taught him that even unexpected circumstances could lead to exciting opportunities. Instead of feeling sorry for himself, Stanley had used his situation to help others and embrace adventure. He realized that challenges often come with hidden advantages—if you're willing to look for them.
