

Name _____

The Life Cycle of a Fox

Short Answer Key

1. Fox kits depend on their mother for warmth, food, and protection.
2. Fox parents help feed their kits by bringing solid food to the den.
3. Play helps young foxes learn important skills like agility and hunting.
4. Young foxes begin to live more independently around six months old.
5. Foxes can face predators, food scarcity, and habitat loss in the wild.
