

Name _____

Frog Families - Short Answers Answer Key

1. Tiny fish with tails
2. They use gills to breathe and need water to survive.
3. Changing from a tadpole to an adult frog with legs and lungs.
4. No, most frog parents don't care for their young because tadpoles grow up independently.
5. Poison dart frogs carry their tadpoles to safe pools; Surinam toads carry eggs on their backs.
