

Name _____

Frog Feasts - Open-Ended Questions Answer Key

1. Frogs swallow their food whole because they don't have teeth to chew. Their stomachs break down the food instead.
2. If there were no insects, frogs might struggle to find enough food and could have trouble surviving.
3. Answers will vary but may include interest in the frog's sticky tongue or eye movement while swallowing.
4. Frogs help balance nature by controlling insect populations and serving as food for other animals.
